**Attachments:** Water Quality Standards (Litigation) 10-14 IO OGC OST redline DGN.docx

Hi, Anna. I've created a clean copy and am ready to send the WQS document to Dave for review. I looked at the comment/responses and think OST did a good job of responding and making changes.

I thought you might like to see how they responded. You will also be copied on the version I send to Dave in a bundle later today.

Just a note that Dave is caught up on the papers now so, drumming his fingers (doubt it) for the final 6. I have 2 ready to go to him today, leaving 4 for tomorrow, to hit an Oct 16 due date, if possible. I know we have a little wiggle room for a couple of papers, nutrients potentially being one and AWIA the other. They were more complex and needed more attention. But if you do have a chance to review nutrients, it would be great.

"make haste slowly" – like the Madeira snails – still trying to figure out what that means. I think they should just scrap it and have a new motto.

Hi Martha. See attached. This reflects some OGC input – from Diane McConkey, who discussed it with Steve N (but Steve didn't feel that he needed to review this in detail). Passing that information on to you to determine the extent to which higher level OGC review is needed. Let me know if you need anything else. This should close the loop on our two papers, with the biosolids one being approved by Dave earlier today.

That makes sense. I have 8 papers with Dave for review and hope to get him 4 more by tomorrow. That leaves space for WQS and three others that are moving slower.

Crossing fingers Dave has few comments. Or next week....I'm going to earn my keep. (Is that like a 1940's midwestern saying? I so hear my grandparents saying it....)

Thanks, Martha. My folks need to do some checking before responding to some of these questions. Deborah is out on Friday and I'd like her to take a look at whatever we send forward. I'm hoping we can get back to you by Tuesday (since Monday is a holiday).

Hi, Tanya. Charlotte and Anna had additional comments on this paper. Can you take a look. I think it may take some effort to address some of them. Let me know what you think.

Thanks.
